

Nigeria - Effata, Inspection of Calabash Water Tanks, 2017

In the period of February, March and April two trainers of IAGU LIMPO –TABANKA SAN / CLEAN WATER – HEALTHY VILLAGE have trained 20 local masons (8 of them deaf). Together they have constructed 35 Calabash tanks. The general supervision was in hands of Frank van der Maas. The trainers Julio and Aladje are from Guinea-B. The whole activity is an example of the collaboration of IAGU LIMPO and Effata. Together with Sadjaliu Djalo, Paul Akkerman visited Frank van der Maas in Nigeria. (5-25 April) Paul inspected the results of the work and he visited the activities of Effata.

Masons Julio and Aladje are glad to see old friends from Guinea-B. Julio Nahonta, Obinna Lazarus, Aladje

Frank van de Maas and his students in the Inclusive Secondary School in Nwofe.

Big experimental tank of 15000 litre and red tank at Inclusive Primary and Secondary School in Nwofe.

The man on the right side is a plumber, he just married and made a special tap (middle) for his wife.
